

# NOW HIRING!

## Quality Assurance Technician

### About This Position

- Assist Engineering & Manufacturing departments with Material Review Board (MRB).
- Perform process audits to validate manufacturing processes and eliminate waste.
- Develop quality checks and participate in internal audits of Quality Management System.
- Participate in corrective actions as assigned by the Quality Manager.
- Perform root cause analysis using data driven approaches (8D, 5 Why, etc.).
- Be the “go to” Quality department representative for defect dispositions to help keep product moving through production operations and prevent nonconforming material from escaping.
- Assist the Quality Manager or Quality Engineers with projects as assigned.

### Requirements

- Associate Degree in a quality or manufacturing field preferred. Experience of 5 years in a related field may be accepted in lieu of a degree.
- Six Sigma Green Belt or equivalent preferred.

### About the Company

- An ISO 9001 certified, privately-owned, family business with over 70 years of experience in the aluminum foundry industry. Eck excels in light-weighting, high temperature aluminum alloys, and in complex castings.
- With an average service level of 13 years, our employees clearly make a difference in our company.
- For those interested in joining our team, we strive to make new employee transitions as smooth as possible. For example, there is no waiting period for health insurance benefits!
